O U T F I T S

**OUTDOOR OUTFITS IS PROUD TO
ANNOUNCE THAT WE HAVE BEEN
CERTIFIED TO MEET THE *NEW***

**NFPA 1999 STANDARD,
2003 EDITION**

Outdoor Outfits is proud to announce that Underwriters Laboratories has CERTIFIED our NFPA series of jackets to the new **NFPA 1999 Standard, 2003 Edition**.

The new NFPA 1999 Standard, 2003 Edition standard has some major improvements:

- 1. Breathability Requirement (Total Heat Loss - THL)** – THL measures heat and moisture released through all of the component fabric layers of the garment (shell and lining). Garments with a high THL performance are more comfortable in hot, humid conditions.
- 2. Spray Rating Requirement** – This requirement measures how water beads on the surface of the outer shell. This would enhance the garment's ability to shed water & contaminants at the outer shell surface.

To learn more about NFPA or to ask us about our product line please contact us at NFPAINfo@outdooroutfits.com or call 416-598-4111 or www.outdooroutfits.com.
